

Passport

Temperature Screening Station

Temperature Screening Made Easy!

Pioneer Passport is the right technology at the right time. A freestanding temperature screening station that is modular, flexible, and adaptable to any healthcare facility entrance.

Instant Accurate Readings

Meets FDA Guidelines

Pioneer Passport meets FDA guidelines for initial body temperature assessment during the COVID-19 Public Health Emergency. It is specifically designed and calibrated for skin temperature measurement and uses a reference heat source for accuracy.

Same Results as Temporal Thermometer

Pioneer Passport utilizes technology to gain the same accuracy as a temporal thermometer but delivered at a safe social distance. Paired with the industry leading thermal camera, the temperature screening station ensures accurate readings the very first time.

Fast Set Up and Operation

Pioneer Passport is perfect for entrance ways and lobbies and can be set up and utilized effectively in just minutes as a fixed or mobile screening station. The Passport has a Windows OS that can easily be paired with your preferred custom screening application.

Fixed Station
